SKILLS

FRONTEND

React.js, Next.js, TypeScript,
JavaScript

MOBILE

React Native, Expo

BACKEND

Node.js, Express.js

DATABASES

MongoDB, MySQL, Firebase

STYLING

Tailwind CSS, Bootstrap, CSS3

TOOLS

Git, Figma, REST APIs, VS Code

PRACTICES

Agile / Scrum, UI/UX Design

OTHER

WordPress, Responsive Design

EDUCATION

MBA in Business Analytics

Amrita University

2026 – Present

Bachelor of Arts in English

Kerala University

2020 – 2023

SUMMARY

Full Stack Developer with 2+ years of experience building web and mobile applications using the MERN stack and React Native. Passionate about clean UI, performant code, and shipping products that solve real problems. Currently building cross-platform products at Codeeq while pursuing an MBA in Business Analytics.

EXPERIENCE

Full Stack Developer

2025 – Present

Codeeq

Remote · Trivandrum / Dubai

- Architect and develop full-stack web applications for international clients using React.js, Next.js, Node.js, and MongoDB, delivering scalable and maintainable codebases
- Lead frontend development by establishing component architecture, TypeScript coding standards, and design system implementation with Tailwind CSS
- Engineer and publish cross-platform mobile applications using React Native and Expo to both iOS App Store and Google Play Store
- Integrate third-party services including Stripe payment gateway, Firebase, and RESTful APIs across multiple client products
- Collaborate directly with clients to translate requirements into production-ready features, iterating on UI/UX and delivering on schedule

Frontend Developer

2024 – 2025

Entrix Labs

Hybrid · Technopark, Trivandrum

- Translated Figma design mockups into pixel-perfect, responsive React.js and Next.js interfaces for production client applications
- Delivered two major client products — Uoto (car rental platform, Dublin Airport) and Meryal Water Park (ticketing and booking, Qatar) — from design handoff to deployment
- Integrated RESTful APIs and third-party payment gateways, optimising frontend bundle performance and improving page load times
- Built reusable component libraries and maintained consistent design systems across multiple projects
- Collaborated cross-functionally with UI/UX designers and backend engineers within an Agile/Scrum workflow

Full Stack Developer Intern

2023 – 2024

Stackup

Onsite · Technopark, Trivandrum

- Developed full-stack features using React.js, Node.js, Express.js, and MongoDB across live products serving real users
- Designed and implemented RESTful APIs and MongoDB data models for user management, authentication, and content modules
- Built responsive React UI components and integrated them with backend services via REST API
- Participated in Agile sprints, code reviews, and team stand-ups, gaining hands-on experience in collaborative software development

PROJECTS

CONTRIBUTED WORKS

@ ENTRIX LABS

Uoto Next.js · TypeScript · Tailwind CSS · REST APIs

Car rental web application built for Dublin Airport, Ireland. Developed the complete frontend in Next.js — vehicle search with advanced filters (category, transmission, capacity), real-time availability calendar, multi-step booking flow, and third-party payment gateway integration. Implemented server-side rendering for fast page loads and SEO, and built responsive layouts optimised for both desktop booking and mobile browsing.

Meryal Water Park Next.js · TypeScript · Tailwind CSS · Payment Integration

Online ticketing and booking platform for Meryal — the largest water park in Qatar. Engineered a multi-step ticket booking experience with dynamic date selection, visitor type and count management, seasonal pass options, and Stripe payment integration. Built attraction and package showcase pages, promotional offer banners, and a mobile-first responsive design to serve a high-volume international audience.

@ CODEEAAQ

ServeSites Next.js · Node.js · MongoDB · Stripe · Tailwind CSS

SaaS platform that enables nonprofit organisations to create fully customisable donation pages and embeddable giving popups — each branded uniquely per client. Donors can give one-time or set up recurring contributions with configurable amounts. Built dynamic per-client page generation with Next.js, integrated Stripe for secure payment processing, and developed an admin dashboard for campaign and donor management.

C-Residence React Native · Expo · Node.js · MongoDB

Cross-platform mobile application for end-to-end residential property management. Features include tenant onboarding and digital lease management, maintenance request submission and tracking with status updates, rent payment recording and automated reminders, digital notice board, and role-based access for property managers and tenants. Published and live on both iOS App Store and Google Play.

C-Parish React Native · Expo · Node.js · MongoDB · Firebase

Church management system built as a React Native mobile app for iOS and Android. Covers member directory with family groupings, event scheduling and

RSVP, mass announcement broadcasting via push notifications, contribution and tithe tracking, and sacrament record management. Implements role-based access control for admins, clergy, and congregation members. Published on iOS App Store and Google Play.

PERSONAL PROJECTS

Gamified LMS React · Node.js · MongoDB · Socket.io

MCQ-based learning platform with XP points, leaderboards, badges, and adaptive difficulty to boost engagement. Real-time score updates via Socket.io and a progress dashboard that tracks streaks and topic mastery.

Employee Management System React · Express · MySQL · JWT

Full-stack CRUD application for managing employee records, departments, payroll, and attendance. Features JWT-based role-based access control for admins and managers, attendance reporting, and payroll summary exports.

Website Builder React · TypeScript · DnD Kit · Tailwind

Drag-and-drop visual page builder for creating responsive websites without code. Supports component reordering, property editing, live preview, and exports clean HTML/CSS — designed for non-technical users.

Dev Portfolio CMS Next.js · Sanity · TypeScript · Tailwind

Headless CMS for managing portfolio content — projects, skills, and experience — with a live-reload preview and one-click Vercel deploy. Sanity Studio powers the backend; Next.js ISR keeps the public site fast and up to date.

Real-time Chat App React · Node.js · Socket.io · Redis

End-to-end encrypted messaging app with rooms, typing indicators, read receipts, and media sharing. Uses Socket.io for real-time delivery and Redis pub/sub to scale message broadcasting across server instances.

Expense Tracker React · Express · MongoDB · Chart.js

Personal finance tracker with categorised spending, monthly budget goals, CSV import, and visual breakdowns via Chart.js. Supports recurring expense tagging and exportable monthly summaries.
